### To Whom It May Concern:

This letter is my personal recommendation for Angela Smith. I was Angela's immediate supervisor while she was at TNR in the GIS Specialist Intern position. I found her to be consistently pleasant, tackling all assignments cheerfully and with dedication.

Besides being a pleasure to work with, Angela showed initiative, resourcefulness and communicated clearly on work assignments. While with TNR, she successfully re-designed our map products for a more visually appealing and up-to-date style. She worked well with even the most demanding of staff and kept me informed of any issues that would arise. Angela also showed a great deal of organization and attention to detail that we utilized in cleaning up redundant files and restructuring our data hierarchy.

I highly recommend Angela for employment. She is a team player and would make a great asset to any organization.

Sincerely,

David Shore
